

5 April 2023

Dear Hiring Manager, Patreon,

I used to be under the delusion that entry-level technical internship positions are supposed to be on the same level having minimal to no impact. However, after reading the "About the Role" section in this job description, I realized the immense overlap between my skills and knowledge and what you are looking for in a potential patronaut intern. This got me excited about the opportunity to contribute to tools building a Creator-to-fan relationship!

What struck me the most was that Patreon isn't expecting new graduates to have industry-level experience but only look for real innate passion while also covering the fundamentals. The mission of "Build with Craft, & Make it Happen," wherein you guys are building the Second Renaissance without showing any signs of backing off, struck a cord in me.

Since my undergrad years, I have always loved to work in teams, and the notion of putting the creators first is one I can get behind. My previous project, Divya Drishti, is aimed at helping Visually Impaired People with their daily mundane tasks, making them independent even in rural areas. This project allowed me to lead a team of 4 working with Python, Android, and Raspberry Pi and to hold interviews with members of the National Association for the Blind to get vital feedback from our intended user base.

Further, Interning the past 2 summers, I have developed robust data structures, data analysis, and database management skills along with my strong problem-solving skills, project management, and ability to work in teams, making me an ideal candidate to become an SDE at Epsilon. In my previous internship at a startup, Makos Infotech, I developed the server-side rendering for their online campus placement website using JavaScript, PHP, and MySQL. Along with this, I also created and managed the existing relational databases using MySQL Workbench. Further, I helped model the website's user interface using Figma and Bootstrap. I enjoyed the opportunity to work on a real-world project and make a tangible impact on the company's product. I am confident that my skills and experience make me a strong candidate to be a Patronaut, and I am eager to grow and develop while learning from the world-class leaders at Patreon.

Thank you for your time and consideration. I would appreciate the chance to discuss further my qualifications and how I can contribute to something that people worldwide get real value from! Please feel free to contact me at your convenience by email (jjhaveri@ucsd.edu) or by telephone (+1 858 214 9192).

Sincerely,

Jay Jhaveri
