EDUCATION

Masters of Computer Science

Sept 2022 – Dec 2023 (Expected)

University of California, San Diego (UCSD)

CGPA: 3.96/4

Relevant Courses: Advanced Computer Vision, Deep Learning, Scalable ML Systems, Recommendation Systems

Bachelor Of Engineering (Computer Engineering)

August 2018 – July 2022

Vivekanand Education Society's Institute of Technology (VESIT)

CGPA: 3.75/4

Relevant Courses: Machine Learning, Object Oriented Programming, Analysis of Algorithms, Data Structures

INTERSHIP EXPERIENCE

Cyber Security & Machine Learning Intern, Legendary Entertainment

June 2023 – Present

- Working on aggregating multiple related and unrelated data sources into a single place using SPLUNK.
- Designing an ML solution to create a universal user behavioral and anomaly detector across multiple applications.

Graduate Student Researcher, Ujima Security and Privacy Research Lab

June 2023 – Present

- Mentoring 4 Undergraduates via the Early Research Student Program (ERSP) on a Computer Security and Privacy project related to upcoming AR/VR technology.
- Leading a team in developing a security-based generative and rule-based chatbot

Full Stack Development Intern, Makos Infotech

June 2021 – July 2021

- Developed Server-side rendering for their main website (Jobaskit.com) utilizing JQuery, PHP, and MySQL, which targets automating the On-campus placement process for various colleges.
- Co-pitched the online job placement portal, Jobaskit, to 3 University professors alongside the founder.
- Mentored 2 intern recruits working on the digitalization of the teaching process.

PROJECTS

Conversational QnA between Doctor-Patient

March 2023 – Present

- ✓ Led team of 4 in fine-tuning diverse language models (e.g., bloom, t5, gpt2) on the MedQuad dataset, comparing them with larger models (gpt3.5, gpt4) using direct questions and prompt engineering.
- ✓ Collaborated with Microsoft researcher Dr. Asma Ben Abacha, creator of the MedQuad dataset, for expert guidance.
- ✓ Utilized ROUGE, BLEU metrics and conducted user surveys for doctors and patients to evaluate model performance.

GrooveGenie: A copyright-free music generator

March 2023 – Present

- ✓ Created an open-source music generation model, utilizing Facebook's EnCodec Transformer model to compress audio wav files to an embedding that can be understood by the model.
- ✓ Training a conditioned GAN network that generates music based on user-provided genre inputs embedded using the BERT model, with a goal of creating only copyright and royalty-free music, being trained on the FMA dataset.
- ✓ Trying out different, more efficient Diffusion/Transformer architecture to generate audio.

Game Genre and Recommendation Classification using Steam Reviews

Nov 2022 – Dec 2022

- ✓ Designed data pipelines to preprocess and apply machine learning techniques to classify game genres and also personalize game recommendations using the user's reviews and hours played.
- ✓ Out of N-gram, Multinomial NB, and Linear SVC, RF with Balanced data & TF-IDF gave the highest accuracy of 90.53%.

Divya-Drishti: An Independent Aid for the Visually Impaired

Aug 2020 – May 2021

- ✓ Created a Voice-activated standalone A-IOT android application using Raspberry Pi4 to help Visually Impaired People (VIPs) accurately and efficiently detect Indian Currency notes, colors, and everyday objects.
- ✓ Funded by the Mumbai University Minor Research Grant Program.
- ✓ Received feedback, on the android-Java app developed, by National Association for the Blind (NAB)'s members.
- ✓ Achieved a 400% net cost reduction compared to products made by OrCam.
- ✓ Published a research paper highlighting the needs of VIPs.
