About Grubhub

Join Our Team

Grubhub is dedicated to connecting hungry diners with delicious restaurants. Our technology makes us an industry leader, building the future of online food

About The Opportunity

We're all about connecting hungry diners with our network of over 300,000 restaurants nationwide. Innovative technology, user-friendly platforms and streamlined delivery capabilities set us apart and make us an industry leader in the world of online food ordering. When you join our team, you become part of a community that works together to innovate, solve problems, grow, work hard and have a ton of fun in the process!

Why Work For Us

Grubhub is a place where authentically fun culture meets innovation and teamwork. We believe in empowering people and opening doors for new opportunities. If you're looking for a place that values strong relationships, embraces diverse ideas—all while having fun together—Grubhub is the place for you!

About The Role:

The Data Engineer position within Grubhub's Growth team plays a pivotal role in enhancing our big data infrastructure and refining existing pipelines that drive Grubhub's growth marketing efforts. Collaborating closely with Customer Engagement and Analytics teams, the Data Engineer will partner to develop automated marketing campaigns and create custom audience segments for email, push, and/or in-app initiatives. Additionally, they will be responsible for developing and maintaining monitoring dashboards to ensure the effectiveness and quality of campaign delivery. As a Data Engineer, you will be expected to develop a well-informed long-term data architecture, lead structured problem-solving efforts, and remain flexible and adaptable to seize new opportunities as they arise. Our team's responsibilities extend to generating automated analytical reports and metrics that are reviewed at senior levels. Candidates should possess expertise in designing, creating, managing, and leveraging large datasets for business purposes.

This position provides a distinct chance to oversee and develop novel solutions for data storage, pipelining, and visualization starting end-to-end. The pipelines and processes developed in this role will be indispensable for accomplishing business needs. As such, we are seeking an individual who can not only excel in engineering tasks but also demonstrate a keen interest in understanding the business intent of their work. The ideal candidate should possess exceptional attention to detail, strong communication skills, resourcefulness, a customer-centric approach, a team-oriented mindset, the ability to work independently in a fast-paced environment, and have an ownership mindset.

What You Bring to the Table (Qualifications Required):

- Bachelor's degree required in Computer Science/Information technology.
- 2+ years of relevant experience in a data engineering role
- Excellent knowledge of SQL
- 1+ years of experience with Python programming language
- Background in ETL and data processing, familiar with how to transform data to meet our goals i.e. launch automated campaigns, and a monitoring dashboard.

- Ability to take on ownership of projects at both a technical and organizational level
- Strong written and oral communication skills to effectively partner with various functional groups
- Willingness to understand the larger business context
- Strong self-management / prioritization capabilities
- Enthusiasm for data and the desire to work with a great team!

Got these? Even better!

- Master's degree in Computer Science/Information technology
- Experience with AWS or another cloud service provider
- Understanding of conventional data warehousing principles like 3NF, star schemas, and dimensional modeling
- Have a strong enthusiasm for learning and sharing knowledge
- Thorough attention to detail and precision, with a structured and organized approach

The Impact You Will Make

- Work with high volumes of data and distributed systems using technologies such as Spark, Hive, AWS EMR, AWS S3, Azkaban, Presto
- Designing and implementing robust data pipelines to efficiently process and analyze large volumes of data
- Developing scalable and maintainable data storage solutions to accommodate the growing needs of the organization
- Collaborating with analysts to understand their requirements for metrics and automate them for campaigns launched, so they can scale and evaluate the performance
- Building monitoring and alerting systems to ensure the integrity and availability of data pipelines
- Optimizing query performance and data processing workflows to reduce latency and improve efficiency
- Providing technical expertise and guidance to other team members on best practices for data engineering and architecture
- Continuously evaluating new technologies and tools to enhance the team's capabilities and improve efficiency

And Of Course, Perks!

- **Flexible PTO.** Grubhub employees enjoy a generous amount of time to recharge.
- **Health and Wellness.** Excellent medical, dental and vision benefits, 401k matching, employee network groups and paid parental leave are just a few of our programs to support your overall well-being.
- **Compensation.** You'll receive a great compensation package with eligibility for generous incentives, bonuses, commission, or RSUs (role-specific).

- **Free Meals.** Our employees get a weekly Grubhub credit to enjoy and support local restaurants.
- **Social Impact.** At Grubhub we believe in giving back through programs like the [Grubhub Community Fund](#). Employees are also given paid time off each year to support the causes that are important to them.

As a matter of company policy, Grubhub does not sponsor applicants for employment visa status for this role.

Grubhub is an equal opportunity employer. We welcome diversity and encourage a workplace that is just as diverse as the customers we serve. We evaluate qualified applicants without regard to race, color, religion, age, sex, sexual orientation, gender identity, national origin, disability, veteran status, and other legally protected characteristics. If you're applying for a job in the U.S. and need a reasonable accommodation for any part of the employment process, please send an email to TalentAcquisition@grubhub.com and let us know the nature of your request and contact information. Please note that only those inquiries concerning a request for reasonable accommodation will be responded to from this email address.

If you are a resident of the State of California and would like a copy of our CA privacy notice, please email privacy@grubhub.com.
