

11 January 2023

Dear Hiring Manager, University Recruiter, Discord,

I am writing to express my interest in the Machine Learning Intern position at Discord. I have been following the company for quite some time and I am particularly drawn to Discord's mission to build belonging and the opportunity to work on a platform team that aims to create the best experience throughout the machine learning workflow.

My previous internship experiences as a Data Analyst at Leadingindia.ai and as a Full Stack Developer at Makos Infotech have given me a strong foundation in data analysis and software development. Furthermore, my coursework at University of California - San Diego such as Recommender Systems, Ai: Probabilistic Reasoning and also my previous experience in Machine Learning during my undergrad at Vivekanand Education Society's Institute of Technology (VESIT) have further honed my skills in machine learning and AI. I also have a strong interest in the MLOps side of machine learning and would love the opportunity to learn how to build at the production scale.

I understand the importance of working collaboratively and I am excited about the opportunity to work alongside experienced engineers and contribute to a project that will go into production. I am also eager to learn and grow my skills in building tools for other engineers and about the whole machine learning workflow.

Thank you for your time and consideration. I would appreciate the chance to further discuss my qualifications and how I can contribute to your team. Please feel free to contact me at your convenience by email (jjhaveri@ucsd.edu) or by telephone (+1 858 214 9192).

Sincerely,

Jay Jhaveri
