

# JAY JHAVERI

(858)214-9192 | [jjhaveri@ucsd.edu](mailto:jjhaveri@ucsd.edu) | San Diego | [linkedin.com/in/jayjhaveri1906/](https://www.linkedin.com/in/jayjhaveri1906/)

## EDUCATION

<b>Masters of Computer Science</b> University of California, San Diego (UCSD) <i>Relevant Courses:</i> Computer Vision, Deep Learning, Recommender Systems, AI: Probabilistic Reasoning	<b>Sept 2022 – Dec 2023 (Expected)</b> CGPA: 3.95/ 4
<b>Bachelor Of Engineering (Computer Engineering)</b> Vivekanand Education Society's Institute of Technology (VESIT) <i>Relevant Courses:</i> Machine Learning, Software Development, Web Development, Cloud Computing, DBMS	<b>August 2018 – July 2022</b> CGPA: 9.013/ 10

## INTERNSHIP EXPERIENCE

<b>Full Stack Developer, Stealth Startup</b> <ul style="list-style-type: none"><li>Integrating Python-based DL architecture to a user-friendly Web Application utilizing AWS and React JS.</li><li>Secured \$100K in funding in AWS credits from Adobe.</li></ul>	<b>Feb 2023 – Present</b>
<b>Full Stack Development Intern, Makos Infotech</b> <ul style="list-style-type: none"><li>Developed Server-side rendering for their main website (Jobaskit.com) utilizing JQuery, PHP, and MySQL, which targets automating the On-campus placement process for various colleges.</li><li>Managed existing and created relational databases using MySQL Workbench and deployed them on AWS.</li><li>Co-pitched the online job placement portal, Jobaskit, to 3 University professors alongside the founder.</li><li>Mentored and Trained 2 intern recruits to get them working on the digitalization of the teaching process.</li></ul>	<b>June 2021 – July 2021</b>
<b>Data Analyst Intern, Leadingindia.ai</b> <ul style="list-style-type: none"><li>Worked in a team of four to build a Vaccine Prediction model on the H1N1 and seasonal flu vaccines to accurately predict the trends of the public acceptance rate (41%) of the Covid-19 vaccine.</li><li><a href="#">Research Paper</a> was published in Springer &amp; I wrote a <a href="#">Blog</a> showcasing the correlation between the two pandemics.</li><li>Secured first position for the mentioned research project amongst 85 peers intercollege.</li></ul>	<b>May 2020 – June 2020</b>
<b>Data Analyst Intern, Núclei Technologies</b> <ul style="list-style-type: none"><li>Applied several supervised ML algorithms such as Linear regression &amp; random forest in R &amp; Python to predict sales of products at specific BigMart store locations based on previous sales data.</li></ul>	<b>Dec 2018 – Jan 2019</b>

## PROJECTS

<b><a href="#">Game Genre and Recommendation Classification using Steam Reviews</a></b> Designed Machine Learning techniques to classify game genres and determine user recommendations such as reviews, hours played. Various models were tested, including N-gram, Multinomial NB, and Linear SVC. Random Forest with Balanced data gave the highest accuracy of 90.53%. <i>Tech Used:</i> Python, Pandas, TF-IDF, scikit-learn, TensorFlow	<b>Nov 2022 – Dec 2022</b>
<b><a href="#">Aatmanirbhar Sanchar: Secure Self-Sufficient Communications</a></b> In collaboration with the <a href="#">Tata Institute of Fundamental Research (TIFR)</a> , developed an off-the-grid, cross-platform, secure (SHA-256) client-server chat application without depending on third-party APIs in the light of recent data privacy issues. I guided my team to adapt a CI/CD outlook on the project and we kept redeploying our app after integrating features and solving bugs based on the feedback we received from our mentors. <i>Tech Used:</i> Python, Node JS, Unix.	<b>June 2021 – May 2022</b>
<b><a href="#">Divya-Drishti: An Independent Aid for the Visually Impaired</a></b> Created a Voice-activated standalone IOT application using Raspberry Pi4 to help <a href="#">Visually Impaired People</a> accurately detect Indian Currency notes, colors, and everyday objects. The project was funded under the <a href="#">Mumbai University Minor Research Grant Program</a> . Received feedback from the members of <a href="#">National Association for the Blind (NAB)</a> . Achieved a 400% in net <a href="#">cost reduction</a> compared to products made by OrCam. <i>Tech Used:</i> TensorFlow, OpenCV2, Google Cloud, Raspberry Pi, Android-Java, Linux, Python. <i>Achievement:</i> Published a <a href="#">research paper</a> highlighting the needs of VIPs.	<b>Aug 2020 – May 2021</b>
<b><a href="#">Code for Change Hackathon: A Data Extraction project</a></b> Developed data extracting software for <a href="#">Global Parli Foundation NGO</a> to automate the translation of Land/Farm ownership papers' pdf originally in Devanagari Script into an editable excel sheet using OCR. Secured <a href="#">first</a> position for the data extraction project amongst the 72 teams participating. <i>Tech Used:</i> Django, Google Cloud, Html/CSS.	<b>Nov 2020 - 24 hours</b>
<b><a href="#">Automated Number Plate Recognition and Parking System</a></b> Built android application connected to a Firebase server, to automate security and space availability in car parking systems by monitoring the number plates detected at the exits, utilizing already installed CCTVs at the entry and exit gates of parking lots. <i>Tech Used:</i> Tesseract OCR, Firebase, Android-Java, Python	<b>Dec 2019 – Feb 2020</b>

## RESEARCH PUBLICATIONS

Inampudi S., Jhaveri J. et al., (2021) **Machine Learning Based Prediction of H1N1 and Seasonal Flu Vaccination**. In: Garg D., Wong K., Sarangapani J., Gupta S.K. (eds) Advanced Computing. IACC 2020. Communications in Computer and Information Science, vol 1367. Springer, Singapore. ([https://doi.org/10.1007/978-981-16-0401-0\\_11](https://doi.org/10.1007/978-981-16-0401-0_11))

**Technical Skills:** Python, PyTorch, TensorFlow, Linux, Git, SQL, Javascript, Android-Java, AWS, Google Cloud, Firebase
