

12 January 2023

Dear Hiring Manager, University Recruiter, Hugging Face,

I am writing to express my interest in the Machine Learning Intern position at Hugging Face. I have been following Hugging Face's journey and am impressed by the company's effort to advance good Machine Learning and make it more accessible through the building of the fastest-growing, open-source collection of pre-trained models, datasets, and demos.

My previous internship experiences as a Data Analyst at Leadingindia.ai and as a Full Stack Developer at Makos Infotech have given me a strong foundation in data analysis and software development. Furthermore, my coursework at University of California - San Diego such as Recommender Systems, Ai: Probabilistic Reasoning and also my previous experience in Machine Learning during my undergrad at Vivekanand Education Society's Institute of Technology (VESIT) have further honed my skills in machine learning and AI. I am particularly excited about the opportunity to contribute to the Gradio library, grow the community of developers, and support outreach efforts as a Gradio intern.

I understand the importance of working collaboratively and I am excited about the opportunity to work with some of the smartest people in the industry and contribute to the ML/AI community at Hugging Face. I am also eager to learn and grow my skills in building tools for other engineers and about the whole machine learning workflow.

Thank you for your time and consideration. I would appreciate the chance to further discuss my qualifications and how I can contribute to your team. Please feel free to contact me at your convenience by email (jjhaveri@ucsd.edu) or by telephone (+1 858 214 9192).

Sincerely,

Jay Jhaveri
