

Software Engineer, Systems

[Apply to Job](#)

 New York, NY

Meta Platforms, Inc. (Meta), formerly known as Facebook Inc., builds technologies that help people connect, find communities, and grow businesses. When Facebook launched in 2004, it changed the way people connect. Apps and services like Messenger, Instagram, WhatsApp, and Novi further empowered billions around the world. Now, Meta is moving beyond 2D screens toward immersive experiences like augmented and virtual reality to help build the next evolution in social technology.

Instructions on how to apply, click “Apply to Job” online on this web page.

Software Engineer, Systems Responsibilities

- Develop, design, create, modify, and/or test software applications or systems for various products or software services.
- Develop a strong understanding of relevant product area, codebase, and/or systems.
- Demonstrate proficiency in data analysis, programming, and software engineering.
- Produce high-quality code with good test coverage using modern abstractions and frameworks.

- May be assigned to specific group focused on product or infrastructure.
- Work on problems of diverse scope where analysis of data requires evaluation of identifiable factors.
- Demonstrate good judgment in selecting methods and techniques for obtaining solutions.
- Work independently, use available resources to get unblocked, and complete tasks on schedule by exercising strong judgment and problem solving skills.
- Master internal development standards from developing to releasing code in order to take on tasks and projects with increasing levels of complexity.

Minimum Qualifications

- Requires a Master's degree in Computer Science, Engineering, Information Systems, Analytics, Mathematics, Statistics, Physics, Applied Sciences, or a related field. Requires completion of a university-level course, research project, internship, or thesis in the following:
- Coding in at least one of the following industry-standard languages: C, C++, Java, Python
- Building large-scale web applications
- Relational database models, query language and database design
- Conducting requirement analysis, design, development, modeling and management
- Creating and evaluating human-computer interfaces/digital user experiences
- Experience with Data processing, operating systems or distributed systems
- Algorithm design and analysis techniques
- Experience with building data-intensive applications using existing Big Data platforms, including Amazon AWS

About Meta

Meta builds technologies that help people connect, find communities, and grow businesses. When Facebook launched in 2004, it changed the way people connect. Apps like Messenger, Instagram and WhatsApp further empowered billions around the world. Now, Meta is moving beyond 2D screens toward immersive experiences like augmented and virtual reality to help build the next evolution in social technology. People who choose to build their careers by building with us at Meta help shape a future that will take us beyond what digital connection makes possible today—beyond the constraints of screens, the limits of distance, and even the rules of physics.

Meta is committed to providing reasonable support (called accommodations) in our recruiting processes

for candidates with disabilities, long term conditions, mental health conditions or sincerely held religious beliefs, or who are neurodivergent or require pregnancy-related support. If you need support, please reach out to accommodations-ext@fb.com.

\$141,238/year to \$158,000/year + bonus + equity + benefits

Individual pay is determined by skills, qualifications, experience, and location. Compensation details listed in this posting reflect the base salary only, and do not include bonus, equity or sales incentives, if applicable. In addition to base salary, Meta offers benefits.
