AI Artificial Intelligence LLM's Machine Learning

Job Details

Austin Fraser is currently supporting an organization in Silcon Valley leading the way & carving the path as it relates to the world of distributed networks. As our client gears up for growth with their second seed round backed by industry leaders, the team is ready to redefine computing power.

This company is currently looking to hire an AI Engineer with experience in Python, LLM's, Neural Networks and Distributed Inference.

Skills Required:

Software Engineering - Expert Level in Python (5-8 Years of Experience)
Experience working with PyTorch, Tensorflow
Experience working with distributed inference and fine tuning LLMS
Expert level experience fine-tuning and deploying neural networks

Preferred Requirements:

Experience working with ML compilers
Experience working with GPU kernels (CUDA)
Experience working with distributed cloud services and microservices

Competitive Compensation
Amazing Benefits
Great Company Culture
The opportunity to join a trending company at the ground level

Due to the proprietary nature of this organization s technology, I am only able to disclose additional details and provide more insight into the role over a brief phone call.

We are actively conducting interviews for this urgent position. If you are interested in learning more about this opportunity, feel free to drop your resume in the chat and let me know when works best to schedule a brief introductory call.

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, or status as a protected veteran.

Check us out on our website and LinkedIn for more roles.

We respect your personal data and would never offer it to third parties! For more information on how we handle your data, feel free to check out the Austin Fraser Privacy Notice or contact

Austin Fraser Inc., 500 W. 2nd Street Suite 1400 Austin, TX 78701
